

Park House English School Calculation Policy Year 3 & 4

Park House
English School

At Park House Primary School, we wish to teach calculation with understanding, and not just as a process that is to be remembered. This Calculation Policy clarifies progression in calculation with examples that are 'mathematically transparent', in other words the way the calculation works is clear and supports both the development of mathematical concepts and closely links it to the mental strategies that are taught alongside the written methods.

AIMS OF THE POLICY

- To ensure consistency and progression in our approach to calculation and enable a smooth transition between year groups and phases.
- To ensure that children develop an efficient, reliable, formal written method of calculation for all operations.
- To ensure that children can use these methods accurately with confidence and understanding.
- To ensure pupils understand important concepts and make connections within mathematics.
- To ensure pupils show high levels of fluency in performing written and mental calculations.
- To ensure that pupils are ready for the next stage of learning and have been given strong foundations in mental methods, the use of practical equipment, allowed to explore jottings in a range of forms and then to move onto more formal recording using a strong knowledge of place value, number lines labelled or blank, partitioning before eventually using compact written methods.
- To ensure that pupils are competent in fluency, reasoning and problem solving and can make informed and appropriate choices about the methods they wish to use (mental or written) to solve mathematical problems efficiently and effectively.

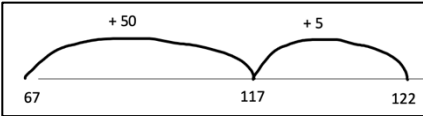

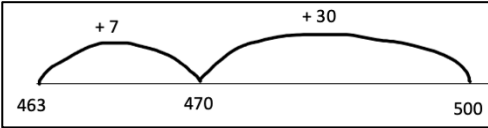

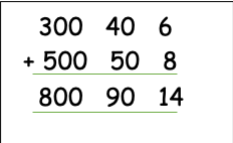

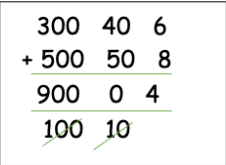

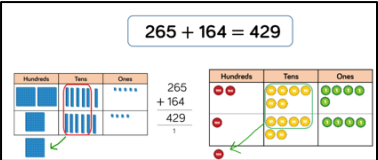

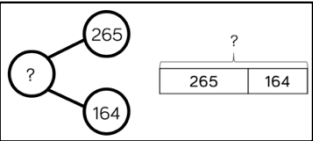

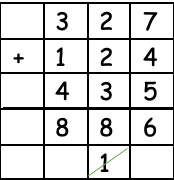

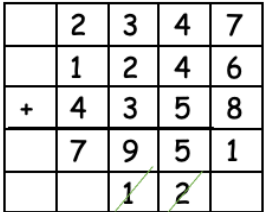

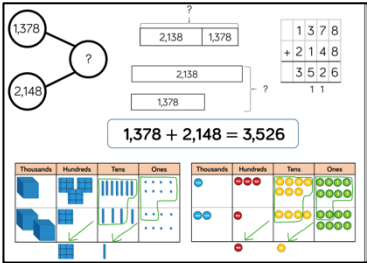

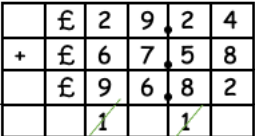

Introduction:

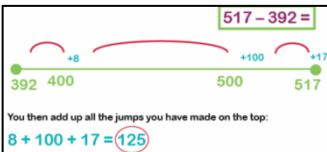

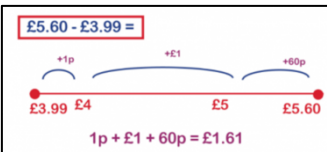

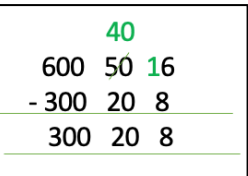

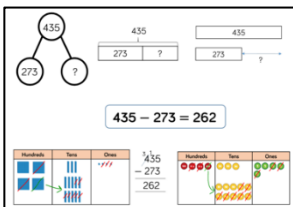

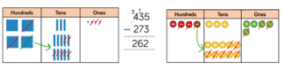

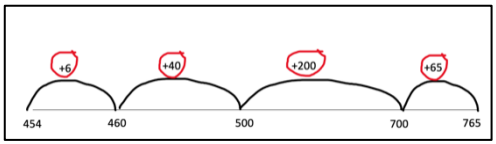

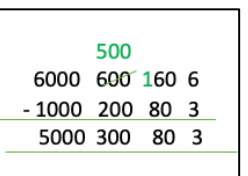

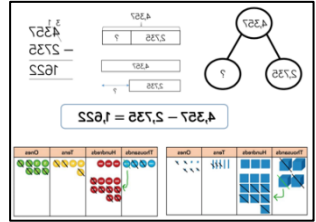

- The policy is set out in subjects, addition, subtraction, multiplication and division. Within each specific area there is a progression of skills, knowledge and layout for written methods. The calculation strategies which will be used will reflect this ideology - moving from concrete to pictorial and then abstract recording leading to more formal written methods. Mental methods and strategies will work in partnership with these methods.

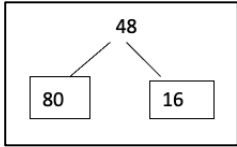

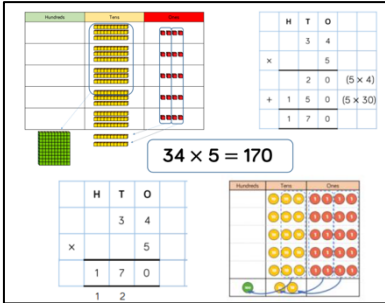

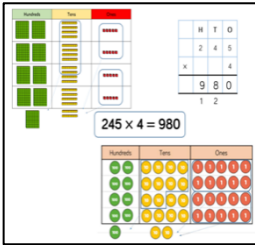

Calculation Policy Years 3-4

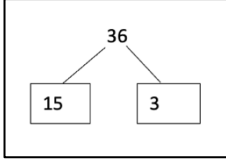

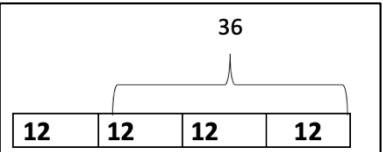

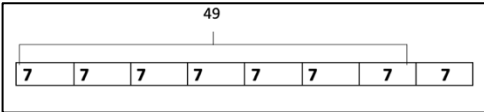

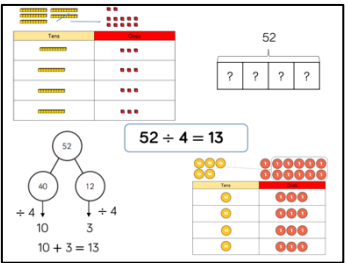

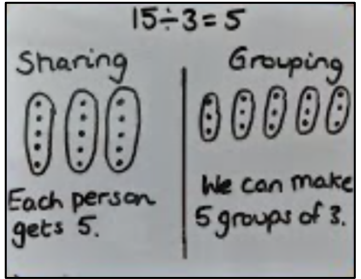

- The basis of our maths calculation policy is that mental and written methods are integral to each other and should not be seen as taking separate paths but developed in conjunction with each other. It is envisaged that the development of mental skills will lead to jottings, (which support mental calculation) and then into more formalised jottings in the form of number lines and partitioning which in turn leads to expanded column methods and ultimately compact algorithms.
- It is important to always show the links between operations and not teach them in isolation or without showing, in practical problem-solving activities and across all mathematical topics, how these operations can be applied.
- It is important that staff always use correct mathematical language and encourage this from every pupil. This will take place in class discussions as well as through oral and written feedback, next steps and target setting.

	<u>Year 3</u>	<u>Year 4</u>
Mental Addition	<p><u>Using Place Value:</u></p> <ul style="list-style-type: none"> Count in hundreds 475+200 as 475, 575, 675 Partitioning e.g. 68+74= 60+70 and 8+4 <p><u>Counting on using number facts:</u></p> <ul style="list-style-type: none"> Add two 2-digit numbers by adding the multiple of ten and then the ones e.g. 67+55  <ul style="list-style-type: none"> Number bonds to 100, e.g. 35 + 65, 46+54, 73+27 Add to the next ten and hundred, e.g. 176+4=180, 435+65=500 	<p><u>Using Place Value:</u></p> <ul style="list-style-type: none"> Count in thousands 1475+3000 as 1475, 2475, 3475, 4475 Partitioning e.g. 343+234= 300+200, 40+30, 4+3 or 134+707 as 130+700 and 4+7 <p><u>Counting on using number facts:</u></p> <ul style="list-style-type: none"> Add two 2-digit numbers by adding the multiple of ten and then the ones e.g. 463+27 Add to the next ten and hundred, e.g. 463+37, 1353+47 Add decimals to the next whole number, e.g. 4.6+0.4 
Written Addition	<ul style="list-style-type: none"> Develop expanded column addition with two 3-digit numbers using partitioning. Expanded column method with 'carrying' Compact column addition with two or more 3-digit numbers or more than two 2-digit numbers. Compact column addition with 3-digit numbers and 4-digit numbers using effective manipulatives and pictorial representations e.g. base 10, place value counters, part- whole and bar modelling.     	<ul style="list-style-type: none"> Build on expanded column addition to develop compact column addition with larger numbers. Compact column addition with larger number up to 4 and 5- digit using effective manipulatives and pictorial representations e.g. base 10, place value counters, part- whole and bar modelling.   
	<ul style="list-style-type: none"> Recognise fractions which add up to make 1 whole e.g. $\frac{1}{4} + \frac{3}{4}$ or $\frac{2}{5} + \frac{3}{5}$ Add fractions with the same denominators e.g. $\frac{3}{5} + \frac{2}{5} = \frac{5}{5}$ or 1 whole 	<ul style="list-style-type: none"> Use expanded and compact column addition to add amounts of money. Add fractions with the same denominators e.g. $\frac{3}{5} + \frac{2}{5} = \frac{5}{5}$ or 1 whole

	Year 3	Year 4																																				
Mental Subtraction	<p>Using Place Value</p> <ul style="list-style-type: none"> Use place value to subtract, e.g. 348-300 or 348-40 or 348-8 Take away multiples of 10,100 and £1, e.g. 476-40=436, 476-300=176, £4.76-£2=£2.76 Using partitioning, e.g. 68-42 as 60-40 and 8-2 or £6.84-£2.40 as £6-£2 and 80p-40p and 4p -0p. Counting back in hundreds, tens and then ones, e.g. 763-121 as 763-100 (663) then subtract 20 (643) then subtract 1 (642) Subtract near multiples, e.g. 648-199 or 86-39 <p>Counting up: (as shown below)</p> <ul style="list-style-type: none"> Finding the difference between two numbers by counting up from the smaller number to the larger number. <p>Using Number Facts:</p> <ul style="list-style-type: none"> Knowing number bonds to 100, e.g. 100-35=65, 100-48=52 etc. 	<p>Using Place Value</p> <ul style="list-style-type: none"> Use place value to subtract e.g. 4748-4000 or 4748-8, etc Take away multiples of 10,100, 1000, £1, 10p or 0.1, e.g. 8392-50 or 6723-3000 or £3.74-30p or 5.6-0.2. Using partitioning, e.g. £5.87-£3.04 as £5-£3 and 7p-4p or 7493-2020 as 7000-2000 and 90-20 Subtract near multiples, e.g. 3522-1999 or £34.86-£19.99 Counting back in thousands, hundreds, tens and then ones, e.g. 6482-1301 as 6482-1000 then -300 then -1 (5181) <p>Counting up: (as shown below)</p> <ul style="list-style-type: none"> Finding the difference between to numbers by counting up from the smaller number to the larger number. <p>Using Number Facts:</p> <ul style="list-style-type: none"> Knowing number bonds to 10,100 and derived facts, e.g. 100-76=24 , 1.0-0.6=0.4 Knowing number bonds to £1 and £10 , e.g. £1.00-86p=14p or £10-£3.40=£6.60 Subtract fractions with the same denominator e.g. $\frac{4}{5} - \frac{2}{5} = \frac{2}{5}$ 																																				
Written Subtraction	<ul style="list-style-type: none"> Develop counting up for subtraction  <p>You then add up all the jumps you have made on the top: $8 + 100 + 17 = 125$</p> <ul style="list-style-type: none"> Use counting up subtraction to find change from £1 and £10  <p>$1p + £1 + 60p = £1.61$</p>  <table border="1" data-bbox="840 1021 1041 1181"> <tr><td></td><td>6</td><td>11</td><td></td></tr> <tr><td></td><td>7</td><td>2</td><td>16</td></tr> <tr><td>-</td><td>3</td><td>5</td><td>8</td></tr> <tr><td></td><td>3</td><td>6</td><td>8</td></tr> </table>  <p>$435 - 273 = 262$</p>  <ul style="list-style-type: none"> Use expanded column subtraction with numbers up to 3 digits. Use compact column subtraction with numbers up to 3 digits using effective manipulatives and pictorial representations e.g. base 10, place value counters, part-whole and bar modelling. 		6	11			7	2	16	-	3	5	8		3	6	8	<ul style="list-style-type: none"> Develop counting up for subtraction.  <ul style="list-style-type: none"> Use counting up to find change from £10, £20, £50 and £100   <table border="1" data-bbox="1892 1037 2150 1204"> <tr><td></td><td>6</td><td>11</td><td>17</td><td></td></tr> <tr><td></td><td>7</td><td>2</td><td>8</td><td>16</td></tr> <tr><td>-</td><td>3</td><td>5</td><td>9</td><td>8</td></tr> <tr><td></td><td>3</td><td>6</td><td>8</td><td>8</td></tr> </table> <ul style="list-style-type: none"> Use expanded column subtraction with numbers up to 4-digits.
